⬇ **Get the code**

Description

This is the original decrapifier.

Check out the user group for later versions!
https://community.spiceworks.com/user-groups/windows-decrapifier-group

I am no longer supporting this and it's not been tested on or written for editions after 1607. YMMV.

Use wisely!

A repair install of Windows can bring back the store/apps and undo the changes here, if you need to.

INSTRUCTIONS:

To use this on your own PC:

- Open administrative Powershell console (type Powershell into the search bar, right click it, run as administrator)
get-executionpolicy

- This will show what the current policy is, usually restricted

set-executionpolicy remotesigned
*Allows you to run the script.

(A) for yes to all

- Navigate to the directory that your script (.ps1 file) is in and type:
.\script.ps1
*Add desired switches.

- The script will run.

- When it's done set the execution policy back to what it was before:
set-executionpolicy restricted (or whatever it was). Choose restricted if you don't know.

- Reboot the computer.

......
